What is a 6V to 12V converter (inverter)?

The PGPI is a 6V to 12V converter for vehicles that still have a 6V, positive ground electrical system. It is necessary if you are still running positive ground for all of our radios, which run on a 12V, negative ground electrical system. The PGPI positive ground inverter comes with detailed wiring instructions.

What is a 12V power inverter?

Power inverters with more than 90% conversion efficiency and stable performance. The 12V power inverter has the functions of current protection, short circuit protection, over-voltage protection, reverse charging protection, power protection, and core protection.

What are the two types of 12V inverters?

There are two main types of 12V inverters: sine and pure sine. Sine inverters produce a blocky signal, while pure sine inverters generate a wavy signal. Pure sine inverters are considered the best 12V inverter models because they produce a cleaner signal, which is better for expensive laptop and camera batteries.
