
2a Uninterruptible Power Supply

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What are Uninterruptible Power Supplies (UPS)?

Uninterruptible power supplies (UPS) are devices that allow machines to keep their field power supplies, programmable logic controllers (PLCs), and communications devices functioning during an unexpected outage. They offer a means of achieving this.

How to connect ups to electric equipment?

1. Connect the electric equipment to the output port of UPS through the matching wire. 2. Turn on the UPS power switch. 3. Insert the DC plug of the adapter into the power input port of the UPS. Then insert the adapter into AC socket to supply the electric equipment uninterrupted. (our product not included adapter).

Can I use the ups as a power bank?

We have attach the 20cm DC cable which can be used for alternative different jack, if your power adapter jack is not suitable, you can use our extend cables which can transfer 5.5*2.5 to 5.5*2.1mm. Don't remove the UPS, it is not advised that use it as a power bank, it is advised to connect the device all the time.
