## 30W Solar Street Light Project Cost

How much do solar street lights cost?

**All-in-One Solar Street Lights:** These lights have the solar panel, battery, and LED lamp integrated into a single unit. They are easier to install and typically cost less upfront. Prices can range from \$100 to \$500 per unit. **Split-Type Solar Street Lights:** In this design, the solar panel and the battery are separate from the light fixture.

What is a solar street light project?

A solar street light project refers to the use of new technology, such as automated control systems, tubular batteries, and panel types, for generating solar electric light in roads. This project is particularly relevant in rural areas like Rajasthan, India, where transportation of electricity is less common. We are studying the implementation of solar street lights in Rajasthan to generate solar electric light on the roads.

Do solar street lights save money?

While solar street lights may have higher initial costs compared to traditional street lights, they offer significant savings over time: **Energy Savings:** Since solar street lights use renewable energy from the sun, they eliminate electricity bills, which can save thousands of dollars over their lifespan.
