[Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many base stations will 5G have in 2025?

The U.S. has ambitious plans for 5G expansion, aiming to have more than 300,000 active base stations by 2025. This goal is being driven by investment from private telecom providers and government initiatives like the Rural 5G Fund. For businesses in the U.S., this means increasing access to high-speed connectivity.

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.
