
Blown fuse in circuit breaker in Canberra

What happens if a circuit breaker trips or a fuse blows?

When a circuit breaker trips or a fuse blows, it's not just an inconvenience--it's a warning sign that something may be wrong with your electrical system. At Electrica Co, we help homeowners and businesses understand the causes, risks, and solutions for these emergencies to keep their properties safe.

What should I do if a breaker trip or fuse blows?

When experiencing a circuit breaker trip, blown fuse, or electrical panel failure, it's essential to stay calm and take the proper steps to ensure safety: Turn off Appliances: In the case of a breaker trip or fuse blow, turn off all appliances connected to the affected circuit to prevent further issues.

Why do I need a circuit breaker?

Circuit breakers and fuses are designed to protect your electrical system by preventing too much current from flowing through it. While many homeowners are familiar with the frustration of dealing with a tripped circuit breaker or a blown fuse, few consider why these electrical issues occur in the first place.

What is a blown fuse?

A blown fuse is a common electrical issue in Australian homes, especially older properties that still use ceramic fuse holders. This guide explains what a fuse does, how to recognise when it has blown and what the warning signs usually look like.
