
Blown fuse in circuit breaker in London

Can a professional electrician fix a blown fuse in Your House?

Fixing a blown fuse in your house can be a dangerous affair. A professional electrician can fix your electric issues and bring light back to your home safely. McCarrick Electric has provided Colorado residents with reliable electrical services and advice for over 40 years. We can help you figure out what to do when you blow a fuse in your house.

What happens if a fuse blows?

Fire hazards, broken equipment, and lost power are some possible consequences of a blown fuse. When a fuse blows, your options are: Ensure you have a new fuse with the same breaking capacity, type, amperage, and rating. Following electrical safety practices are also an essential part of learning how to replace a blown fuse.

How do you fix a blown fuse?

Use a screwdriver to unscrew the blown fuse and remove it from the fuse box. Screw the new fuse into the electrical socket and remove the broken fuse. Once the new fuse is in place, power your house back on and check if the new fuse is working properly. You can do this by plugging in a few appliances to confirm the connection's stability.

What causes a blown fuse?

This can occur due to wear and tear, rodents chewing through wires, or water damage. Damaged wiring can cause electrical currents to leak away from the circuit, leading to a blown fuse. Regular electrical inspections can help identify damaged wiring, and a qualified electrician can repair or replace damaged wires to prevent further issues.
