
Brasilia Solar Onsite Energy

Does Brazil have a large solar generation capacity?

In 2012, Brazil implemented net metering policies, which have recently contributed to large increases in distributed solar generation capacity. Compared with distributed solar, utility-scale solar generating capacity at the end of June was only 17.9 GW, according to the Brazilian Electricity Regulatory Agency (ANEEL).

Is Brazil embracing solar energy?

Brazil isn't just embracing solar energy--it's revolutionizing its potential in the global energy sector. As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history.

Fifteen years ago, no one could have imagined that Brazil would become one of the world's largest powers in photovoltaic solar energy.

How many solar power systems are there in Brazil?

As of June 30, 2025, total solar electric generating capacity in Brazil was 23% of the total electric generating capacity. Home and building owners installed more than 3.7 million renewable distributed generation systems in Brazil as of June 30, 2025.

Which region has the most solar power in Brazil?

Today, the north-east leads the country's solar market. According to the Brazilian National Electric Energy Agency (Aneel), the region has accumulated more than 60% of the total power solar capacity that is authorised to operate in the national system (excluding distributed generation).

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years.

In 2012, Brazil implemented net metering policies, which have recently contributed to large increases in distributed solar generation capacity. Compared with distributed solar, ...

This format now accounts for almost 70% of solar energy in Brazil, and is the main driver of solar's growth in the country. Until ...

"The potential for solar energy in Brazil is immense.... [But] the relatively low patenting activity suggests that many companies are yet to fully explore the opportunities ...

The government of the Federal District ("FD") plans to increase sustainability and resilience of the electric supply system of the district that pursues the two-pronged approach: (i) to increase ...

Founded in 2013, the Brazilian Photovoltaic Solar Energy Association (ABSOLAR) brings together companies and professionals from the entire production chain of the ...

Onsite energy encompasses a broad range of technologies that are suitable to serve large energy loads, including battery storage, combined heat and power, district energy, ...

Renewables curtailment in Brazil in the first half of 2025 is straining investment and highlighting grid and transmission limits, with analysts calling for clearer pricing and ...

This format now accounts for almost 70% of solar energy in Brazil, and is the main driver of solar's growth in the country. Until recently, individual users of solar power could sell ...

The Chinese PV manufacturer is stepping up its energy storage push with a new Beijing subsidiary capitalized at RMB 300 million (\$42 million).

Reduz significativamente a conta de energia elétrica. A parcela da energia solar que vocênão utiliza vira créditos para você usar nas contas de luz ...
