

Construction of energy storage projects in Southern Europe

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

How big is Europe's energy storage capacity?

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies - chemical storage, electrochemical storage, mechanical storage, and thermal storage.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record-breaking installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned ...

On 17 December, Hyperion Renewables launched construction of its first battery energy storage projects in Portugal, in Estremoz and Vora. The 16 MW / 64 MWh solar-plus ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record-breaking installations, and bringing ...

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy ...

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned and under construction -, by location and by ...

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the ...

The report also projects continued strong growth through 2030, driven by technological advancements, policy support, and other ...

International energy consultancy Wood Mackenzie has released groundbreaking research showing

Europe's battery energy storage system (BESS) market is experiencing ...

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...
