

# Container energy storage in Izmir Türkiye

What is the future of energy storage?

Moreover, there have been significant investments in battery technologies, specifically targeting the storage and the effective use of energy from volatile sources such as wind and solar power. Various projects are underway to integrate energy storage systems into smart grid infrastructure.

Are storage activities legal in Turkey?

The first legal provision on storage activities in Turkish law was introduced with the subparagraph (e) added to Article 14 of the Electricity Market Law No 6,446 (EML) with the amendment dated 21 March 2018. With the relevant amendment, storage activities have been regulated as an activity which can generally be conducted without a licence.

How are electricity storage facilities established?

Electricity storage facilities can be established in different ways depending on the licence types of legal entities operating in the electricity market. Storage facilities with a maximum installed capacity of 1 MW can also be established by technology development zones and industrial zones for use in their R&D activities.
