
Double glass sun room

Can a sunroom system be built with double pane glass windows?

Both the Alpha Plus and OMEGA systems can be built with double pane glass windows. ONLY THE OMEGA sunroom system comes with the extra vinyl cladding on the extruded aluminum framing to provide that extra layer of thermal protection making it the ultimate in 4 season comfort. These are not "cookie cutter" modules!

How do I customize my sunroom windows?

We offer a wide variety of ways to customize your sunroom windows, even in non-traditional areas. We offer 3 door options for our sunroom additions, and all three include windows in their design. A sliding patio door slides open to either the left or right. Like the sliding windows, the window is stationary within its frame.

Can you use aluminum in a sunroom?

This is because typical vinyl window frames can't support the weight of the sunroom. So, aluminum is still commonly used even though it is an inefficient building material. At LivingSpace, we reinvented the design of the sunroom to allow our vinyl-fiberglass composite window frame to be used.

What are sunroom windows?

These sunroom windows are a great option to allow natural sunlight into your home. Similar to picture windows, sidelights are fixed windows that are usually placed on either side of a door. They are skinnier than picture windows to accommodate this placement. They are great options to match with any window option combination.
