# East Timor Sunshine New Energy Storage Base

Is East Timor interested in solar power?

East Timor President Jos#233; Ramos-Horta told The Associated Press in an interview in Dili last week that his country is interested in exploring various types of renewable energy sources, including wind, sea and especially solar power. "We have plenty of sun," he said, adding that the cost of solar technology continues to fall.

Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.

Will East Timor take a major step towards energy independence?

East Timor is set to take a major step towards energy independence and economic growth as Woodside Energy confirms plans to start liquefied natural gas (LNG) production from the Greater Sunrise project by 2032. This development could transform the nation's economy and strengthen Asia's energy security. The concept involves:
