

# Estonia's largest solar energy storage company

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How much solar power is produced in Estonia?

This represents about one-tenth of the total solar capacity currently produced in Estonia," said Karl Kull, CEO of Evecon. "We would like to thank Mirova for the success of this project and also for trusting the Estonian renewable energy market."

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

Can storage systems help reduce energy consumption in Estonia?

Estonia's climate minister, Yoko Alender, emphasized the role of storage systems in this transition, stating, "Estonia has a clear goal - by 2030, the amount of electricity we consume must come from renewable sources.
