
Estonian supercapacitor manufacturer

What are skeleton supercapacitors used for?

Founded in 2009, Skeleton's supercapacitors are used in transport, grid, industrial, and automotive applications and allow to reduce CO2 emissions and save energy.

Where are the three Estonian scientists now?

Next year, Skeleton will open the largest supercapacitor factory in Europe, producing twelve million cells a year. As the new generation of engineers is taking over, the three Estonian scientists are remaining in their small town in Tartu where it all started. Marian Männi is an Estonian investigative journalist.

Why are supercapacitors important?

Supercapacitors are essential for producing and storing green energy. The curved graphene invented by Leis, Arulepp and Perkson made the existing supercapacitors much more efficient. They could keep and provide bursts of energy better than other commercial carbons, withstanding over one million charge cycles.

How many supercapacitor cells does skeleton produce a year?

The next-generation supercapacitor cell factory is scheduled to start production in 2024 and produce up to 12 million cells a year, which is 40 times more than Skeleton's first factory in Saxony, Germany that will continue as an R&D factory in the future.

Skeleton Technologies has opened a EUR220 million supercapacitor plant in Leipzig, Germany, expanding production for Europe's grid and fast-growing U.S. AI data centers.

Skeleton Technologies, an Estonian energy storage technology firm, announced recently that it will develop a new plant producing supercapacitors near Leipzig, Germany, with ...

The Leipzig factory Skeleton Technologies is expanding its supercapacitor manufacturing with a new factory near Leipzig in collaboration with Siemens, set to be ...

Skeleton Technologies, an Estonian energy storage technology firm, announced recently that it will develop a new plant ...

The leading Supercapacitor Manufacturers in Estonia are listed in this directory. You can narrow down the list of manufacturers based on their location and capabilities, browse their product ...

Decades of work and collaboration led to a green energy storage solution - Estonian researchers Jaan Leis, Mati Arulepp and Anti Perkson found a way to use curved ...

The Estonian company Skeleton has opened a EUR220 million supercapacitor factory in Leipzig to support artificial intelligence data centers and stabilize Europe's power grids.

A new fully automated factory One of the Estonian future unicorns, Skeleton Technologies announced the building of a fully automated, digitalised ...

Skeleton Technologies, founded in Estonia in 2009, specializes in advanced energy storage solutions using Curved Graphene. Offering supercapacitors and SuperBattery technology, ...

Skeleton Technologies, founded in Estonia in 2009, specializes in advanced energy storage solutions using Curved Graphene. Offering ...

The Leipzig factory Skeleton Technologies is expanding its supercapacitor manufacturing with a new factory near Leipzig in ...

A new fully automated factory One of the Estonian future unicorns, Skeleton Technologies announced the building of a fully automated, digitalised manufacturing plant in the Leipzig ...
