# European solar power station energy storage policy

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

Why should battery storage be a political priority in Europe?

Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness. The mission of the Battery Storage Europe Platform is to make battery storage and flexibility a political priority by: Placing battery storage at the top of the EU agenda for energy security and competitiveness.

Should energy storage be regulated in Europe?

As renewable energy continues to expand in Europe, energy storage must keep pace to ensure the grid remains flexible and stable. The Energy Storage Coalition urges the European Commission to develop an Action Plan on Energy Storage, providing much-needed regulatory clarity and supporting Member States in scaling up energy storage capacity.

Is a tenfold increase in battery energy storage possible in Europe?

The organization is calling for a tenfold increase in battery energy storage in Europe by 2030, to reach 500 GWh to 780 GWh. European PV association SolarPower Europe has launched its European Battery Storage Platform to advance the business model and regulatory framework for battery energy storage across the European Union.
