
Fire protection uninterruptible power supply supplier

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) | Schneider Electric Hong Kong, China. An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

What is a three-phase online modular uninterruptible power supply system?

Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA. Delta's UPSs are some of the most advanced in the industry, renowned for their innovation, reliability, and efficiency.

Why do you need a 3-phase UPS system?

It also serves as a reliable battery backup. A 3-phase UPS system is crucial in data centres, edge computing, and industrial applications where uptime and data integrity are vital. It protects servers, storage systems, networking equipment from power quality issues.

What is a 3 phase UPS?

In the Ultron UPS family, three-phase online UPSs have power ratings of up to 4000 kVA, perfect for data centers, industrial facilities, and more. Three-Phase online modular uninterruptible power supply systems from the Modulon UPS family offer scalability and redundancy in a single frame, with up to 600 kVA.
