
Frequency conversion control cabinet inverter unit

Which frequency inverters are suitable for control cabinets?

We have developed the NORDAC PRO family of frequency inverters especially for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all conceivable customer requirements thanks to a wide range of options.

What is frequency inverter?

Frequency inverter is a dedicated accessory of inverter cabinet, the variable frequency control the speed and the main technical parameters depends on the specification of built-in inverter and external configuration. Inverter cabinet have big difference according to the use of different application and different functions.

What is a frequency converter control panel / electrical control panel?

The frequency converter control panel (VFD electric control panel / electrical control panel) can widely use in metallurgy, chemical industry, petroleum, water supply, mine, building material, electrical motor industry, such as pumps, fans, air compressor, rolling mill, injection molding machine, conveyer belt and other machinery and equipments.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.25 to 160 kW and can be extended with optional plug-in modules. Variable cooling concepts ensure optimum heat dissipation. Why Inverters for control cabinet installation from NORD?

Explore the pivotal role of frequency conversion cabinets in modern industry, focusing on energy efficiency, motor control systems, and enhanced performance. Discover ...

ZFENG Industry-specific one-piece frequency conversion cabinet, Inverter Series, Everest control cabinet power saving cabinet based on industry customer segmentation needs and ...

Product description: The frequency conversion control cabinet mainly consists of four parts: the frequency converter, the control unit, the power distribution components and the cabinet ...

Various control options (switches, potentiometers or parameterisation units) Variants with functional safety (Safe Stop (STO, SS1)) Available for SK 510E and above ...
