## Generator set solar

What is a small Solar power generator?

A small solar power generator is a relatively cheap,sustainable way to generate off-the-grid power when you need it. For example,if you have a cabin that you can't connect to a power grid and you don't want to rely on a traditional gasoline-powered generator,you might consider installing a small photovoltaic solar power system.

How do you use a solar power generator?

Solar power generator solar panels are smaller and more portable than on-grid solar system panels, so you can move them around later on fairly easily if you need to. Plug your batteries into the charge controller. Connect the positive and negative cables from the batteries to the positive and negative terminals on the charge controller.
