
Home terrace solar panels

Why should you install solar panels on a terrace?

Here's why: Ample sunlight exposure: The terrace, being on the top of the house, is naturally exposed to sunlight for most of the day, making it an ideal location for solar panel installation. Space efficiency: Most terraces have unused space that can be repurposed to generate energy, which means you don't have to compromise on your living space.

Where should solar panels be installed on a terraced house?

On terraced houses, because of the limited space, the solar panels will need to be installed either on the front or the back of the property. One thing you should consider when making this decision is not the aesthetics, but the side of the roof that will get the most sun.

Are terraced homes a good choice for solar panels?

But, as the solar power revolution grows, more and more terraced home owners are opting to install solar power systems in their homes. In fact, terraced houses are quickly becoming one of the most popular property types for solar panel installation, nationwide. So, the simple answer to the question, is yes! But what are the considerations?

How many solar panels are on the Terrace site?

The Terrace site at Northern Solar Project has 8 roof-top solar panels. These panels, which are thin-film and a newer technology that works better in low-light conditions, were installed by community members during a workshop in the fall of 2013. They are grid-tie, meaning that any excess electricity is fed into the grid and sold to BC Hydro.
