## How many meteorological base stations are there in the EU

How many weather stations are there in the UK?

The Met Office has a weather station network across the whole UK, with more than 200 automatic stations. These weather stations measure a large variety of different meteorological parameters, including air temperature; atmospheric pressure; rainfall; wind speed and direction, humidity; cloud height and visibility.

How many atmospheric stations are there in the world?

Each of the current 46 Atmosphere stations measures greenhouse gas concentrations (such as carbon dioxide and methane) in the atmosphere, as well as meteorological parameters. Atmospheric measurements are usually taken on top of tall towers, in mountainous terrain or in remote environments.

Where can I find a weather station in the UK?

WOW has been developed by the Met Office in partnership with the Royal Meteorological Society and the Department for Education. You can view, register and login to the website at: [WOW](#) The Met Office has a weather station network across the whole UK, with more than 200 automatic stations.

What is a weather station?

Stations are usually around 40 km apart, enabling us to record the weather associated with the typical low pressure and frontal systems that cross the UK. Weather stations - hourly observations Weather stations are found throughout the UK, providing valuable data to our meteorologists.

As of June 2010, the European Climate Assessment and Dataset contains 13472 series of observations at 3314 meteorological stations provided by 56 participants from 61 different ...

The ICOS Atmosphere network includes stations in 16 European countries. Each of the current 46 Atmosphere stations measures greenhouse gas concentrations (such as carbon ...

Weather stations The Met Office has a weather station network across the whole UK, with more than 200 automatic stations. These weather stations ...

About the Global Map This Google Map shows the locations of current affiliated regional weather network member stations.

E-OBS is a daily gridded land-only observational dataset over Europe. The blended time series from the station network of the European Climate Assessment & Dataset ...
