# How much does a rooftop solar panel cost the householder

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. 1,2,12 This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Is rooftop solar a good investment?

Rooftop solar power represents one of the most impactful decisions homeowners can make for their finances, energy independence, and environmental impact. With 2025 bringing continued cost reductions, technological improvements, and strong federal incentives, the value proposition for rooftop solar has never been stronger.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much do solar panels cost in 2025? The average homeowner spends \$19,873 on solar panels. But costs range from \$12,600 to \$33,376 depending on system size and location
