
How to cancel the registration of a power base station

How do I register a base station?

Press OK on the handset to enter the main menu. Select Settings > Registration > Register Handset. The LCD screen displays the list of bases (Base1-Base4). Press Up or Down to highlight the desired one, and then press the OK soft key. The handset begins to search for the base station.

Do I need to de-register my handsets if my base station is replaced?

If your base station has been replaced you do not need to de-register your handsets before registering them with the new base station, because your handsets can be registered with up to 4 different base stations. To register your handsets to the new base station, follow the manual handset registration instructions for each handset.

How do I register a phone to another base station?

You need to enter the base PIN (default: 0000) after a base is found. You can register the handset to another base station if you want to discard the current registration. Make sure the base station is in the registration mode. Go to OK > Settings > Registration > Register Handset.

What if my handset is not registered to the base unit?

The supplied handset and base unit are preregistered. If for some reason the handset is not registered to the base unit, re-register the handset. When you purchase an additional handset, refer to the additional handset's installation manual for registration procedure.
