# Huawei solar container battery electrolyte

Is Huawei launching a solid-state battery?

Solid-state battery efforts might gain a significant boost from technology giant Huawei. The company patented a solid-state battery with an energy density between 400 Wh/kg and 500 Wh/kg. The battery uses a sulfide-based electrolyte and a lithium-metal anode, promising better ionic conductivity compared to other solid-state battery cells.

Will Huawei replace liquid batteries with solid electrolytes?

By replacing these liquid components with solid electrolytes, Huawei aims to significantly enhance the lifespan, safety, and performance of batteries, particularly for applications like electric vehicles (EVs) and energy storage systems.

What ionic conductivity does a Huawei battery use?

The battery uses a sulfide-based electrolyte and a lithium-metal anode, promising better ionic conductivity compared to other solid-state battery cells. Huawei said it doped the sulfide-based electrolyte with nitrogen from cyanide to mitigate interface instability.

What is Huawei sulfide-based solid-state battery technology?

Huawei is set to make a significant advancement in energy storage with its latest development in solid-state battery technology. The tech giant has recently unveiled a patent for a sulfide-based solid electrolyte, a crucial component for next-generation lithium-ion batteries.

Huawei's new patent on sulfide solid-state batteries addresses liquid battery degradation, promising high energy density, safety, long life, and stability for EVs and storage.

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an unprecedented driving range of over 3,000 ...

In a move that would provide major boost to battery technology in electric vehicles (EVs), Chinese tech conglomerate Huawei ...

Huawei has recently issued a new patent regarding solid-state battery tech. It would be a wonderful implementation in the energy ...

In a move that would provide major boost to battery technology in electric vehicles (EVs), Chinese tech conglomerate Huawei has filed a new patent application for a sulfide ...

Chinese tech giant Huawei has filed a patent for a next-generation solid-state electric vehicle (EV) battery that claims to offer an ...

The patent abstract indicates that the application provides a battery pack with an electrolyte drainage function, which is part of an energy storage system. This battery pack ...

Huawei has recently issued a new patent regarding solid-state battery tech. It would be a wonderful implementation in the energy storage sector. It will further act as a vital ...

---

The battery uses a sulfide-based electrolyte and a lithium-metal anode, promising better ionic conductivity compared to other solid-state battery cells.

Huawei filed a patent for a sulfide solid-state battery, claiming a 3,000 km range and five-minute recharge using nitrogen-doped ...

The battery uses a sulfide-based electrolyte and a lithium-metal anode, promising better ionic conductivity ...
