
Installing solar sun room and choosing glass

How do I choose the best glass for my sunroom?

Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project. While sunroom location and type are very important, the safety of the glass is also a necessary consideration. Make sure that you ask for tempered glass.

How do you choose a sunroom window?

Ideally, a sunroom's windows should be able to keep the heat of the sun's rays out, but allow the natural light in. There are several ways you can accomplish this. First, you can choose windows that have multiple panes of glass. Or, you can choose windows that have Low-E coatings, which reflect heat energy.

Should you build a sunroom with floor-to-ceiling glass?

To maximize a great outdoor view from your home, a sunroom with floor-to-ceiling glass, also called a solarium, could be the right choice for you. This special sunroom has wall-to-wall glass as well as a glass roof. Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project.

Does sunroom glass need to be insulated?

The structure or frame that holds your sunroom glass should be "thermally broken," meaning that there is a material that insulates the inside part of the frame from the outside within the frame's structure. It is important to ask how your sunroom glass is insulated and know the replacement policy in case a pane fails.
