
Inverter 3KW sine wave

What is a 3000-watt pure sine wave inverter?

A 3000-watt pure sine wave inverter is a device that converts DC current to AC current in the form of a pure sine wave, with a maximum output power of 3000 watts. It is typically used to power appliances from solar panels or batteries.

How does a pure sine wave inverter work?

A pure sine wave inverter works by converting DC power from a battery or other source into AC power, mimicking the waveform of standard mains electricity. It is also protected from high current and voltage fluctuations, providing peace of mind.

Will I be charged if I buy a 3000W solar inverter?

You won't be charged until the item ships. A revolutionary all-in-one solar inverter: the 3000W solar inverter has a built-in 60A MPPT charge controller and operates from 24V to 110V or 120V AC.
