## Korea Public New Energy Station

How GE Vernova & KEPCO will support South Korea's energy transition?

Order secured through KAPES, the joint venture between GE Vernova and Korea Electric Power Corporation (KEPCO). Advanced HVDC system, based on Line Commutated Converter (LCC) technology, aims for reliable and efficient power transmission and can support South Korea's energy transition by integrating renewable energy into the grid.

Will EP2 help South Korea's energy transition?

"Projects like EP2 are pivotal in enabling South Korea's energy transition," said Shailesh Mishra, Regional Leader of Grid Systems Integration in Asia Pacific at GE Vernova.

Will KEPCO build another 300 MW battery energy storage system?

The utility also plans to build another 300 MW battery energy storage system by 2028. Korea Electric Power Corp. (KEPCO) has completed construction of a large battery energy storage project in Miryang, Gyeongsangnam-do Province.

What is Asia's largest battery energy storage system?

Billed as Asia's largest battery energy storage system for grid stabilization purposes, the system has a power output of 978 MW and a storage capacity of 889 MWh. The ceremony marking the completion of construction was held on Thursday, September 27, at the 154 kV Bubuk Substation in Miryang.

Between 2021 and 2023, South Korea installed more than 123,000 facilities through its new and renewable energy supply project.

BNEF's New Energy Outlook: South Korea indicates that decarbonizing electricity supply is key to the country staying on track with ...

Korea Electric Power Corp. (KEPCO) has officially finished construction works on a massive battery energy storage project in the city of Miryang, in Gyeongsangnam-do ...

Korea Electric Power Corp. (KEPCO) has completed construction of a large battery energy storage project in Miryang, Gyeongsangnam-do Province. As Asia's largest battery energy ...

KEPCO, South Korea's biggest electric utility, has inaugurated a portfolio of large-scale battery energy storage system (BESS) assets.

As the RE100 campaign has gained global momentum, we have implemented a Korean RE100 system (renewable energy use verification system) customized for local business needs. This ...

Kyunghnam Energy (KNE), an integrated energy platform of Prostar Capital, has developed and commissioned Korea's first green hydrogen refueling station based on anion ...

Global Energy & Solutions Leader, Power Businesses including Transmission, Transformation, Distribution, New Technologies & Emerging Businesses.

BNEF's New Energy Outlook: South Korea indicates that decarbonizing electricity supply is key to the country staying on track with the Paris Agreement's goals this decade ...
