# Latvia's regulations on installing green base stations for communications

Did Latvia transpose directive 2018/1972?

However, the majority of EU member states, including Latvia, failed to transpose Directive 2018/1972 establishing the European Electronic Communications Code in time. The new EEC was finally accepted in Latvia in its final reading on 2 June 2022.

Is carbon transportation allowed in Latvia?

However, carbon transportation in Latvia is allowed (Law on Pollution, Section 8). Currently Latvia is developing a new Climate Law with the aim of providing basis for further development of national climate policy, setting conditions related to regulation on greenhouse gas emissions.

Is carbon dioxide stored in geological structures in Latvia?

The second part of Article 45 of the draft law stipulates that the geological storage of carbon dioxide in geological structures, as well as in the vertical water layer, is prohibited in territory of Latvia, its exclusive economic zone and the continental shelf.

Is there a ban on CO<sub>2</sub> storage in Latvia?

According to current version of the draft law the ban on CO<sub>2</sub> storage in Latvia remains. The ban was established considering that no special research was carried out with the aim of determining the suitability of underground structures for the safe storage of CO<sub>2</sub>.
