
Madrid household energy storage anti-dumping

Does Spain have a state aid scheme for energy storage?

The European Commission has approved a EUR699 million state aid scheme in Spain to support the deployment of up to 3.5GW of energy storage.

What is the future of energy storage in Spain?

In conclusion, the legislative landscape for BESS in Spain is evolving to support the country's ambitious renewable energy targets. While challenges remain, the combination of supportive policies, financial incentives, and technological innovation bodes well for the future of energy storage in Spain.

Why is energy storage a problem in Spain?

Despite having a clear strategy and ambitious goals in the sector of energy storage in Spain, subsidies and direct aid specific to these technologies remain limited. This creates a significant barrier for companies and individuals interested in investing in energy storage solutions.

How does Spain regulate electric power storage facilities?

Regulation of Electric Power Storage Facilities: In 2020, Spain introduced a specific regulation (Royal Decree 1183/2020) that defines the administrative procedures for the deployment of storage systems, including BESS. This decree aims to streamline the permitting process, addressing the complexities and delays previously encountered.

The market energy storage in Spain, particularly in relation to the BESS systems (Battery Energy Storage Systems), is undergoing a dynamic and accelerated evolution. This ...

Why Spain's Grid Can't Wait for Modern Storage Solutions You know how people say "the future is now"? Well, Spain's energy sector's been living that reality since 2023. With solar ...

The decree explicitly classifies energy storage facilities and their associated grid connection infrastructure as "public utility" for the first time. This grants them legal support ...
