

New Energy Storage High-end Manufacturing

What is the new-type energy storage manufacturing industry?

According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage manufacturing industry refers to the sector that produces energy storage, information processing, safety control, and other products related to new energy storage methods.

How will China promote the new-type energy storage manufacturing sector?

BEIJING, Feb. 17 -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging industries and the country's modern industrial system.

How will China's new-energy storage industry grow by 2027?

Photo: VCG China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation and competitiveness, and achieve high-end, intelligent and green industry growth.

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

Shanghai charts pioneering course in the high-end equipment industry, aiming for global prominence by 2025 through innovation and strategic integration. Boasting remarkable ...

Energy Storage Manufacturing Analysis NLR's advanced manufacturing researchers provide state-of-the-art energy storage ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

Bian said the administration will further promote the orderly development of new energy storage technology, while vigorously ...

Energy Storage Manufacturing Analysis NLR's advanced manufacturing researchers provide state-of-the-art energy storage analysis exploring circular economy, ...

Encourage local governments to introduce special policies to support technological progress in new-type energy storage system manufacturing as well as the transformation and upgrading of ...

The plan focuses on technological innovation, including the upgrading of lithium batteries and support for disruptive technologies. ...

China's nationwide installed capacity of new-type energy storage has exceeded 100 GW, more than 30 times the level at the end of the 13th Five-Year Plan period.

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to ...

Recently, ZGC (Fangshan) Green Energy Industrial Park was approved, with ZGC Advanced Technology Company, under ZGC Development Group, as its operator. The park is ...

The plan focuses on technological innovation, including the upgrading of lithium batteries and support for disruptive technologies. China's Ministry of Industry and Information ...

The document underlined the importance of supporting upstream and downstream enterprises in the new-type energy storage manufacturing sector to optimize their energy ...
