# North America Micro solar Panel Customization Manufacturer

Who makes solar panels in USA?

First Solar, Hanwha Q Cells, Canadian Solar, T1 Energy, and Illuminate USA are the top 5 solar panel manufacturing companies in the US, ranked based on their production capacity in 2025. Are solar panels manufactured in the USA? Yes, solar panels are manufactured in the USA.

Where are mission solar panels made?

Product Origin and Manufacturing Locations: Sunny San Antonio, Texas, is a fitting place to design and manufacture solar panels. At their facility, American workers put every Mission Solar panel through a 14-item quality control checklist.

Where are solar panels made?

Until recently, most of the solar panels installed in the United States were not actually made here. Instead, they were manufactured overseas--mainly in China--where production costs were lower. However, a shift has taken place in the American solar industry over the past few years.

Why should you choose a solar panel that is made in America?

Choosing a solar panel that is made in the United States supports both American manufacturing and American jobs. Because these panels are designed and tested in the U.S., the specifications provided are true to the environment that you will use them in most of the time.
