

Norway Bergen develops new energy storage equipment

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Is Norway a battery region?

As a battery region, the Nordics have become a notable actor in the broader European battery market. They have also joined forces on global projects, such as the export of energy storage systems to Egypt and Lebanon. "The rest of the world understands that Norway is an important player in all things battery."

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering ...

Summary: As Norway accelerates its renewable energy transition, the proposed Bergen Energy Storage Power Station has become a focal point for industry observers. This ...

In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering underwater energy storage system that turns ocean ...

SunContainer Innovations - As Norway accelerates its transition to renewable energy, the EK SOLAR Energy Storage Power Station in Bergen stands as a critical infrastructure project. ...

On 26 September the Norwegian Minister of Energy conducts the official opening of the Northern Lights CO₂ transport and storage ...

General - Storage System Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the deep sea to deliver ...

Summary: Bergen's push toward renewable energy integration makes containerized energy storage systems a game-changer. This article explores how modular battery solutions address ...

On 26 September the Norwegian Minister of Energy conducts the official opening of the Northern Lights CO₂ transport and storage facility in Stavanger, near Bergen. The ...

BERGEN, June 25, 2025 - SLB OneSubsea has been awarded an EPC contract by Equinor for a subsea CO₂ injection system for phase two of the Northern Lights project offshore Norway, ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...

General - Storage System Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses ...

NES will deliver the equipment during the first quarter of 2025 and manage the project from its headquarters in Bergen, Norway. "Reducing energy consumption on offshore ...
