This proven technology offers long-term savings and energy independence, making it a great option for off-grid or hybrid systems in New Zealand. Take control with custom off-grid solar solutions. Power Options designs and installs systems tailored to your needs, for complete energy independence.

What types of solar systems are available in New Zealand?

Single phase and multi phase systems are available, either grid connected or totally independent of the grid. We specialise in Off Grid Solar Energy solutions which we offer New Zealand wide. Our team will travel to you to complete the installation personally to the highest standard.

What is an off-grid Solar System?

Off-grid systems are an ideal option for those faced with high grid connection costs, who live in remote locations or areas with unreliable grid power, or seeking total energy autonomy. Unlike grid-tied systems, off-grid solar setups must generate and store all the energy you need. The key components are typically:
