What is a solar inverter?

A solar inverter is a critical component of a solar energy system, responsible for converting the direct current (DC) power generated by solar panels into alternating current (AC) power that can be used to power homes and businesses. The process of converting DC to AC involves several stages, including the following:

Who should install a solar inverter?

Solar inverters should always be installed by a professional installer, like ZEN Energy, with experience in solar energy systems. Attempting to install a solar inverter yourself could be dangerous and may also result in damage to the inverter, the solar panels, or other components of your solar energy system.
