
Reset circuit breaker factory in Portugal

How do I Reset my circuit breaker if it tripped?

Resetting your circuit breaker is necessary to get power back on when a breaker has tripped, and it is not a particularly complicated process, but, like many simple things, there are still steps that should be taken in a specific order to ensure nothing goes wrong. #1 Unplug all appliances and turn off the lights.

What is a tripped breaker?

The terms "tripped breaker" or "tripped circuit" denote situations where the circuit breaker has automatically switched off due to an overload or short circuit, effectively cutting off the power supply to that specific area. This comprehensive guide aims to provide an in-depth understanding of circuit breakers and how to reset them.

How do I fix a tripped breaker?

Prepare to Reset the Breaker: Ensure all connected appliances are turned off before resetting the tripped circuit. Reset the Breaker: Firmly push the tripped breaker to the "off" position and flip it back to "on." Professional assistance may be necessary if it won't stay ON or immediately trips again (or if it's stuck in the middle).

What to do if a circuit breaker trips?

Turn off and unplug everything on the circuit, then reset the breaker. If it trips, turn off the breaker and call an electrician. Power off all electrical devices connected to the circuit breaker. Any device can create a demand on a single circuit and overload it, tripping the breaker off.
