

# **Serbia's cost-effectiveness of industrial and commercial energy storage batteries**

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.

What happened to battery energy storage systems in Germany?

Small-scale lithium-ion residential battery systems in the German market suggest that between 2014 and 2020, battery energy storage systems (BESS) prices fell by 71%, to USD 776/kWh.

What is a battery used for?

The batteries, with their high energy density, are well-suited for large-scale energy storage applications, including grid energy storage and the storage of renewable energy.

What is battery energy storage system (BESS)?
