

# Solar circuit breaker factory in Dominican-Republic

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

Why does the Dominican Republic need solar power?

The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power. In addition, the island state is suffering from a continuous shortage of electricity, which makes the expansion of generation capacities imperative.

Is photovoltaic technology right for the Dominican Republic?

Here, too, photovoltaic technology is the method of choice. As the largest solar park in the Caribbean with a total capacity of 116 MW (phase I - 58 MW, phase II - 58 MW), the Montecristi solar park has laid the foundation for a sustainable turnaround in energy policy in the Dominican Republic.

What makes Dominican Republic a dream destination?

In the Dominican Republic and the entire Caribbean region, thoughts of white beaches and dream holidays are inevitable. The framework conditions for this are provided by the world's largest energy source, the sun. Global radiation is about double that of Germany.

EcoDirect designs and supplies solar + battery projects in the Dominican Republic. Our team has the tools and experience to get your next project designed and delivered.
