# Solar fusion tile

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is a GoodWe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Which fusion tiles are the best?

The next collection from Fusion is called Summit, and it features the same unique hybrid core. The color options represent mountain ranges and natural wonders like Yellowstone and Denali, and we think you will be just as impressed with their tile options as well. Badlands is our personal favorite, but all three are unique.

Frequently Asked Questions (FAQs) What are solar panel roof tiles? Solar panel roof tiles are integrated roofing materials that generate electricity from sunlight. Unlike traditional solar ...
