
Solar module export data

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

How many GW of solar modules did Africa Import in 2024?

Africa imported 1.31 GW of modules from China in December 2024, up 17% MoM from 1.12 GW and up 222% YoY from 0.41 GW. China exported 3.62 GW of modules to the Africa in 4Q24, up 164 % YoY from 1.37 GW. In 2024, cumulative shipments to the Middle East reached 11.36 GW, representing a 43% YoY increase from 7.94 GW.

What is the Ember China solar export dataset?

Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market. Ember's China solar exports dataset is sourced from the General Administration of Customs of the People's Republic of China (GACC): Data is available from 2017 to present.

China leads the world in Solar Module exports with 103,827 shipments, followed by Vietnam with 95,537 shipments, and India taking the third spot with 29,388 shipments

Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

According to the data from January and February, India's photovoltaic new installations were 2.26GW, a 109.36% increase year-on ...

Discover data on Photovoltaic: Import and Export in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. Global module shipments increased 13% ...

In May 2024, China's solar module exports showed a notable trend: higher volumes but lower prices. Data from the General Administration of Customs and calculations ...

SOLAR MODULE - Overview Eximpedia analyses Solar Module export import records, including data from

576 buyers and 2102 suppliers. We provide an intelligence report of Apple that ...

InfoLink's customs data shows that China exported about 23.38 GW of PV modules in March 2025, up 44% MoM but down 5% YoY from 24.51 GW. China's total module exports ...

According to the data from January and February, India's photovoltaic new installations were 2.26GW, a 109.36% increase year-on-year. The export value of inverters in ...
