## **Solar panel battery connected to inverter**

How to connect solar panels to inverter?

While connecting solar panels to the inverter, ensure that the input voltage does not exceed the maximum voltage level or total power. This will determine the number of solar panels connected in series in one string. - Check that the voltage rating meets the requirements for the location in which you are installing the solar system.

How do you connect a solar panel to a battery controller?

Connect loads to the controller. Connect the battery to the controller first, ensuring the middle light turns on. Lastly, connect the solar panel to the charge controller. The system is designed for easy use with plug-and-play functionality and pre-paired connectors, requiring no additional setup.

How do I set up a solar panel?

To set up a Thunderbolt Magnum Solar 100 Watt solar panel, unfold the stand in the rear of the panels, find a sunny spot, plug in the required cables and other hardware, and you are good to go. The universal DC power adapter, battery terminal clamps, power control panel, and 12 volt light kit are included.
