# Solar panels solar lights batteries

Do solar-powered lights need batteries?

Yes, solar-powered lights typically need batteries. These batteries for solar lighting store the energy generated by the solar panel during the day. When the sun goes down or if the solar panel cannot produce energy, the battery provides the stored energy to the light, making the light operational even in darkness.

What is a solar battery & how does it work?

It's like a big battery that keeps all the extra power your solar panels make. Instead of giving away that extra juice back to the main power grid, often for a tiny thank you, this battery stores it for you. So, you can use your own solar energy even when the sun has taken the day off. Here's a quick breakdown:
