## Solar powered water pumps

What is a solar water-powered pump?

These are the solar panels, solar pump inverter, and water pump. At its most basic, the solar water-powered pump is an electric pump, which is powered by electric energy that is harnessed using solar panels. The first component is the solar panels, which gather the sun's energy and convert it into electric power.

How to use a solar water pump?

Operation is simple! Just place the solar panel in the sun before putting the pump in your fountain and enjoy the soothing sound of water. Start: The water pump will not work without sunlight. It will restart within three seconds once the sunlight reappears. Restart: If sunshine is off, it can restart within 3 seconds when sunshine is back.
