
Solar tile specifications and models

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar roof tiles a good choice?

Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection. With a 25-year warranty, Solar Roof will continue to produce clean energy and protect your home for decades to come.

What are tractile solar roof tiles?

Tractile solar roof tiles are designed to integrate with the Tractile roof tile range as part of a complete roofing solution to provide a strong, high performance roof that harvests solar energy for your home. kWp (KiloWatt Peak) - Measures the peak capacity of the system.

What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

Solar Roof Tiles meet or exceed all IBC International Building Codes & IEC International Energy Codes & Certifications.
