
The latest on Victorian energy storage project planning

Will Victorian Government approve a battery energy storage system?

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions.

What is Victoria's largest-ever battery storage project?

The Victorian Government has approved the state's largest-ever battery storage project - a one-gigawatt facility that it says will deliver cleaner, cheaper, and more reliable renewable energy for hundreds of thousands of homes. Pacific Green's Portland Energy Park has been fast-tracked through the Government's Development Facilitation Program.

Can Victorian energy storage be connected by 2035?

Victorian Planning Minister Sonya Kilkenny said the new approvals pathway is playing a key role in achieving the state's energy storage targets of connecting at least 2.6 GW of energy storage capacity by 2030 and at least 6.3 GW by 2035.

What is the AC Energy battery energy storage project?

As it happens, it was an AC Energy battery project that was first to be approved under Victoria's fast-track program; the Joel Joel Battery Energy Storage Project being developed in Victoria's Wimmera region at the same size and duration (350 MW/700 MWh) as the Little River BESS.

A new big battery was approved after just nine weeks, marking the first renewables project to be fully processed under the ...

One of the biggest battery energy storage systems (BESS) built in Victoria has been switched on, providing essential grid services ...

Latrobe Valley, Victoria - EnergyAustralia has today marked a major milestone with the official turning of the sod for the 350 MW ...

Developer AC Energy has seen its 350MW/770MWh Little River battery energy storage system fast-tracked by the Victoria ...

This priority project will deliver cheaper and cleaner energy, while supporting Victoria's transition to a sustainable energy future. AC Energy's Battery Energy Storage ...

Melbourne will be home to one of Australia's largest grid-scale BESS (battery energy storage systems) as part of a new renewable energy hub in the city's west. Delivered ...

Pacific Green receives Victorian Government approval to invest A\$1.3 billion in Australia's largest 1-GW/2.5-GWh battery storage project in Portland, expected to operate in ...

The proposed battery energy storage system (BESS) is planned to be installed in southwest Victoria, around five kilometres away from the town of Heywood and in proximity to ...

The Victorian Government has approved the state's largest-ever battery storage project - a one-gigawatt facility that it says will deliver cleaner, cheaper, and more reliable ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of ...

Plans for what will be one of the biggest batteries in Victoria have been given the green light for development through the state government's fast-track program.

The Victoria government streamlines the planning process to deliver the state's "largest" BESS, AEnergy's 350MW/700MWh Joel Joel ...
