
Tourist attractions in Brussels use photovoltaic folding containers for bidirectional charging

Can bidirectional charging save Europe's energy & mobility sectors?

Bidirectional charging technology has the potential to save billions of euros annually by optimizing electricity usage and reducing system costs. A recent study by Transport & Environment (T&E) reveals that this innovative technology could transform Europe's energy and mobility sectors.

What to see in Brussels?

Fans of the Art Nouveau style will discover particularly wonderful gems like the Horta Museum, Solvay House, Maison Hannon, and more. Read on to learn about 12 more stunning tourist attractions that are must-see on your visit to Brussels.

What is a photovoltaic container?

This device is usually composed of a standard-sized container equipped with photovoltaic modules, photovoltaic inverters, photovoltaic controllers and batteries. The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce volume and weight for easy transportation and storage.

What is Brussels famous for?

A large, cobblestone market square serves as something of Belgium's nucleus, surrounded by stunningly ornate architecture mostly constructed between the 1400s and the late 1600s. The square is home to the towering Hôtel de Ville de Bruxelles, or Brussels Town Hall, with its soaring Gothic tower.

From La Grande-Place to the striking Atomium, and the beautiful La Cambre Abbey, check out the top 12 attractions you can't miss on a visit to Brussels.
