

# Turkmenistan Communications 5G base station is now available

Does Turkmenistan have a 5G network?

By June 2025, Arkadag became the first city in Turkmenistan with a pilot 5G network, implemented in cooperation with China's Huawei and using the national satellite for backhaul. This 5G pilot is an exception - nationwide, Turkmenistan's mobile data operates mostly on slower 3G/4G technologies.

When did 5G start in Turkmenistan?

In February 2025, a 4G+(LTE-Advanced) network was launched in the model "smart city" of Arkadag. By June 2025, Arkadag became the first city in Turkmenistan with a pilot 5G network, implemented in cooperation with China's Huawei and using the national satellite for backhaul.

Will Turkmenistan launch 5G in 2025?

In June 2025, officials claimed to launch 5G in Arkadag as a pilot - making it the first 5G deployment in Turkmenistan. This 5G network reportedly uses the Turkmenlem-52 satellite to provide backhaul/frequency, given the lack of a robust terrestrial fiber backbone in that area.

Will Turkmenistan have a national digital network in 2022?

"National Digital Network" Initiative: In 2022, Turkmenistan announced plans for a so-called national "digital network" that would not be connected to the global internet. This appears to be an attempt to create a domestic intranet for e-government and information sharing under full state control.

Turkmenistan will investigate the potential implementation of 5G technology, the State News Agency of Turkmenistan reports. This proposal, presented by Mammetkhan ...

UK comms regulator Ofcom says the number of 5G base stations in the UK doubled in 2021, and coverage is now 'outside 42-57' ...

The higher the frequency, the more data it transmits. 5G core network architecture operates on different frequency bands, but it's the ...

Consequently, the 5G network is now available throughout Arkadag city. In the context of rapid economic digitalization, 5G stands as the highest-speed generation of internet ...

Turkmenistan is starting to implement 5G technology - the first new generation network will be deployed in the city of Arkadag. This became known during the working visit of ...

Huawei communication base stations have been installed to test the new technology. 5G has impressive features: high data ...
