# Uninterruptible power supply 5kv

What is a 3kva uninterruptible power supply?

3kVA uninterruptible power supplies are designed to power loads up to 3kVA but the kilo-Watt loading will depend on the UPS output power factor. Typical loads for a 3kVA UPS include file servers, storage devices, IT networks and VoIP telecoms systems.

How does a 5V uninterruptible power supply work?

Many commonly available 5V Uninterruptible Power Supplies feature a two chip design with a Li-Ion battery charger to charge the back-up battery, and boost converter to step up the battery voltage back up to 5V. Like most of my personal designs, cost was not a primary driver.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS), calculate the average power required for all connected appliances. For instance, a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.
