
Uninterruptible power supply installation in South Africa

What is a UPS / uninterruptible power supply?

The key function of a UPS or Uninterruptible power supply is to provide power in the short-term. This is a back-up system when the input power source fails. The UPS system is battery powered. Most times the UPS system will correct common problems experienced by the utility. Choose your UPS system by quality rather than by capacity.

Do you need uninterruptible power supplies?

As a business owner, you can't risk power cuts taking down your IT systems and machinery, and our range of uninterruptible power supplies will give you the time you need to safely shut down non-essential machinery, as well as maintaining power to the areas of your office or factory that need it.
