By Zhang Hongguan &Zhang Yufeng Uninterrupted power supply for remote base stations has been a challengesince the founding of the wireless industry,but alternative sources have a chance of succeeding where traditional solutions have failed.

What is an uninterruptible power supply (UPS)?
An Uninterruptible Power Supply (UPS) is key in server rooms and data centres. Why? It gives backup power during blackouts, keeping vital equipment running. It works fast as light, spots power gaps, and then flips to its battery reserve. This avoids losing data or damaging hardware. What's more?

How does ups work in a server room?
UPS for server room works in three main ways of functioning. Here,the UPS gets its power from the regular power supply. This supply has the right voltage and frequency the UPS needs to work. During the Normal Mode a piece called a rectifier changes AC power to DC power. This powers up an inverter and charges batteries.

Server Room Environments supplies a wide range of power protection solutions and can supply a one-off UPS system or design, install and commission a compete power protection package ...
