# Victoria solar off-grid power generation system

What is an off-grid solar energy system with battery storage?

An off-grid solar energy system with battery storage offers a range of benefits for remote businesses, particularly those who are in regional Victoria. We design and install larger-scale off-grid systems based on your power usage and requirements. The commercial level stand alone solar systems start from 40kWh storage capacity.

What is an off-grid Solar System?

Off-grid solar systems offer complete power over energy production and consumption, eliminating intermediaries to give you full freedom over how and what energy you produce or consume. An off-grid system grants energy independence as well as security in areas with unstable power grids, limited infrastructure or high connection costs.

What is the easiest off-grid power solution in Australia?

Solaris unquestionably the easiest off-grid power solution. Much of Australia receives over 2,800 hours of sunshine annually, making solar an ideal choice for households seeking an off-grid system. Solar panels are powerful tools capable of harnessing sunlight to produce energy, which is then stored in batteries for use at night or on cloudy days.

Who can use GES energy off-grid?

GES Energy provides off-grid solutions for clinics, retail companies, cottage industries, agriculture businesses, telecoms, offices, and other commercial entities. An off-grid solar energy system with battery storage offers a range of benefits for remote businesses, particularly those who are in regional Victoria.
