# Vietnam household energy storage power supply

What is the largest electricity storage project in Vietnam?

The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project. Located in Ninh Thuan province, the project has a capacity of 1,200 MW and is expected to play a crucial role in stabilizing the grid when it completes in a few years.

Why is Bess important in Vietnam's energy transition?

**Regulatory Landscape** The Vietnamese government has recognized the importance of BESS in the country's energy transition. The revised National Energy Policy includes new incentives for BESS installations, such as tax credits and subsidies, which are aimed at accelerating the adoption of energy storage solutions.

What is Bess & how can it help Vietnam?

**Energy Management:** BESS can help manage the intermittency of renewable energy sources, ensuring a balanced and stable supply of electricity. Vietnam has 20.1 GW of solar and wind power, and congestion in the electricity transmission grid sometimes lead to waste of electricity.

How much does a Bess system cost in Vietnam?

In 2023, EVN PECC3 estimated that the cost for a 2 MWh BESS system was 360-420 USD/kWh, and that the investment would require electricity prices in Vietnam above 18 UScent/kWh to be profitable - this is twice the current levels. However, BESS costs are declining rapidly.
