
Villa solar split system

What is a solar mini split?

So what makes it solar? A solar mini split is simply a mini split system powered by solar energy, either directly from solar panels or indirectly through battery storage. Some systems are built for direct DC solar input, while most standard models run on AC power, which means you'll need an inverter to power them from solar panels.

What is a hybrid solar mini split unit?

The Hybrid Solar Mini Split Unit is ideal for expanding or upgrading your system. It includes the A/C unit only and integrates with both solar and grid power. Direct Solar Power is a supplier solar systems for homes and businesses across the USA with a focus quality support. Call 848-600-6420 to start your project today!

Are solar mini splits a good investment?

If you're looking for an efficient, scalable, and low-maintenance way to heat and cool your space, solar mini splits are one of the smartest upgrades you can make. They give you year-round comfort without depending on the grid. And when paired with the right solar system, they can run for free, indefinitely. Want to Power a Mini Split Off-Grid?

What does a hybrid solar mini split kit include?

Our Hybrid Solar Mini Split Kit includes the A/C unit, solar panels, inverter, wiring, and DC disconnect. It's perfect for new installations or reliable, plug-and-play systems that run on solar or grid power. Already have solar? The Hybrid Solar Mini Split Unit is ideal for expanding or upgrading your system.
